## ✘ Key Market Challenges

### ✘ Limitations of Centralized Exchanges:

KYC, regulations, custody risks, non-transparency, slow speed of adding new coins.

### ✘ Complex Liquidity Provision:

Traditional liquidity systems need to be improved.

### ✘ Low Transaction Speed on TOP DEXes:

Ethereum's ~15 TPS is insufficient for current demands.

### ✘ Onboarding of New Users:

High entry barriers for newcomers.

## PRPX Solutions

Solutions

### High-Speed Decentralized Blockchain:

A custom solution supporting 100,000+ TPS from a skilled team who built [AirDAO](#).

### Hybrid Liquidity Model:

Combining DLOB and AMM.

### Simplified User Experience:

Utilizing account abstraction for signing in with mail/Google/FB.

### Social Trading:

Copytrading of profitable traders' strategies and investing in pools under their management.

#### Innovative Trading Features:

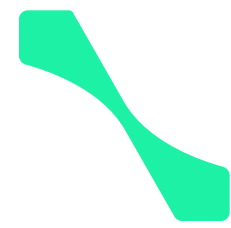

- Wide range of trading pairs with attractive fees and rapidly adding more tokens.
- Efficient leveraged trading and funding rate mechanisms.
- Robust liquidation and trade matching systems.

#### Protocol Token for Governance:

Encouraging community involvement through a governance token, fostering a decentralized ecosystem.

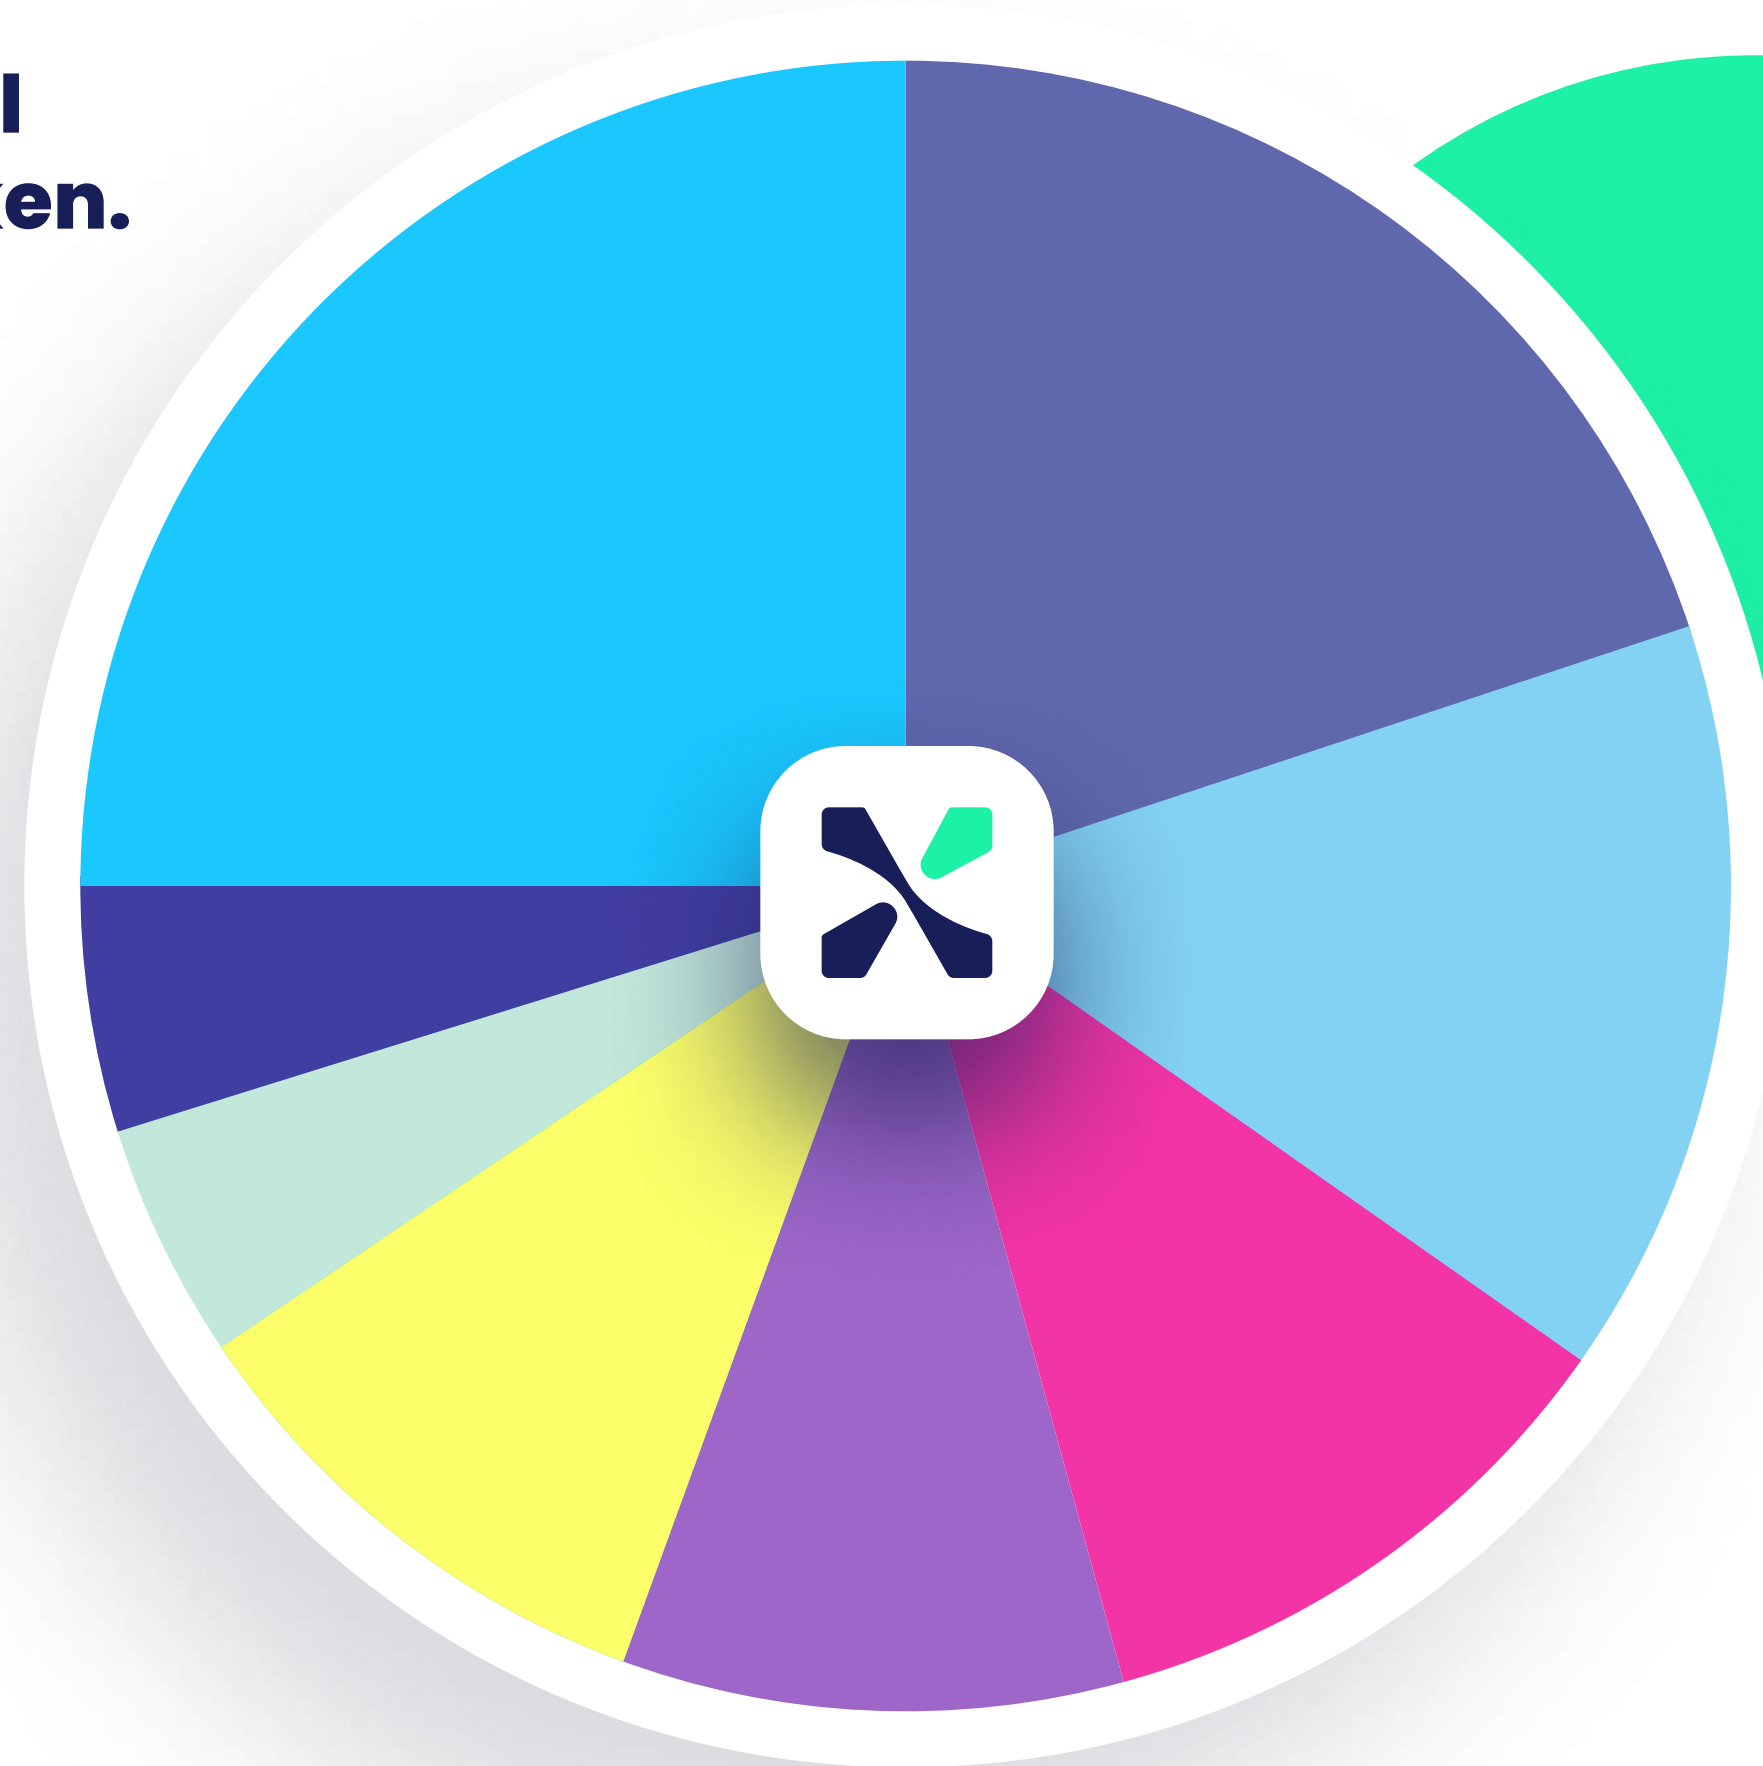

# Tokenomics and Strategic Funding Goals

**Fees and Governance all accrue to the \$PRPX Token.**

## Token Allocation

 Ecosystem	<b>25%</b>
 Treasury	<b>20%</b>
 Early Investors	<b>15%</b>
 Liquidity	<b>10%</b>
 Team	<b>10%</b>
 Marketing	<b>10%</b>
 Public sale	<b>5%</b>
 Advisors	<b>5%</b>

## Funding Target:

**Angel Investments: \$500k**  
for 1% SAFE + token warrant.

Funds will be used for MVP and further fundraising.

**Early Investors: \$7,5M**  
on a valuation of \$50M.  
15% SAFE + token warrant.

Backed by the successful investment campaign for Pembrock Finance, our team's expertise ensures a smooth fundraising process for PRPX.

# Our Journey Ahead: The PRPX Roadmap

Roadmap

Q3 2024

- **Social Trading** with strategy sharing and replication features.

- **Innovative Trading Features:** Multiple trading pairs, efficient leveraged trading, advanced liquidation and trade matching systems.

Q2 2024

- **Hybrid Liquidity Model:** Combined DLOB with liquidity pools. Protocol vaults: for social trading features, liquidations, AMM.

- **Launch of \$PRPX Token** enabling its staking for governance and protocol sharing.

- **Liquidity Onboarding:** at least 2 partnerships with Market Makers.

Q1 2024

- Ready **LI Blockchain** customized to perpetual futures trading.

- **Simple Login** via mail/Google/FB utilized by account abstractions.

- **Fundraising:** EthDenver & Token2049 Dubai participation.

Q4 2023

- **High-Speed, Decentralized Blockchain:** 25% complete, focusing on high TPS.

- **Simplified User Experience:** 50% complete, emphasizing intuitive onboarding.

# Join our Team in Shaping the Future of Decentralized Trading!

Team

**Igor**

## Growth

Grown projects to \$10m+ valuation; launched 3 DeFi projects.

**Sofia**

## Marketing

Launched campaign that fundraised \$ 1,2M of early investments,

**Alex**

## Strategies & Legal

Managed assets of private investors and funds; traded on 50+ protocols.

**Valerii**

## Tech

Built a top ETH mining infrastructure.

**Oleksii**

## Blockchain

Crafted architecture for 10+ blockchain projects; created Ambrosus LI.
